Keynote speech

Roberto Viola, Director General for Communications Networks, Content and Technology (CNECT), European Commission (TBC)

10.00

Keynote speech

Burkhard Balz, Member of the executive board, Deutsche Bundesbank

10.20

SESSION 1

What future for hybrid and multi-cloud computing in banking?

Cloud computing acts as a key enabler for innovative service solutions in financial services. European banks are on a journey to meet evolving customer demands and business requirements with the help of innovative cloud solutions. To that end, the banking ecosystem experiences changes from internally engineered capabilities to more hybrid/public cloud solutions. This session will address the fast-evolving cloud development and its prospects for banking.

11.10

Networking coffee break

11.40

Introducing EBF Cloud Banking Forum's technical guidance

European banks operate under a strict legislative and supervisory framework that reflects responsibilities towards financial stability and customers' trust. This introduction will showcase the technical work (good practices and recommendations) that the EBF Cloud Banking Forum designed in order to support the implementation of the European Banking Authority's guidelines on outsourcing arrangements in regard to cloud with the aim to facilitate harmonization and a common understanding of the banking sector's approach to cloud.

A Q&A session will allow the audience to address questions to presenting members of the Forum.

12.10

SESSION 2

Growing in a multi-cloud environment: the role of exit strategy

The banking sector's approach to cloud usage is facing a cloud environment with multiple cloud service providers. At the same time, regulators voice concerns regarding systemic concentration of the sector. This session addresses the role of exit strategy for navigation of the evolving cloud environment and will be an opportunity to elaborate further on the EBF recommendations.

13.00

Networking lunch

14.00

Unveiling the innovative potential of cloud computing

Presentation of an example for cloud's technological evolution.

14.10

SESSION 3

Preventing multi-cloud security risks

European Banks and Cloud Service Providers invest heavily in cybersecurity to prevent cyberattacks and increase their cyber resilience. In order to enhance legal certainty, trust and ensure financial stability, discussions are taking place at EU level on the need for a certification scheme for cloud security and around interdependencies in the finance sector. Facing an evolving service landscape as well as the multitude of security considerations for the financial sector, this session brings together experts to exchange on security in a multi-cloud environment.

15.00

Networking coffee break

15.30

SESSION 4

Improving ICT risk management for EU finance

Information and communication technology can introduce technologically inherent risks to conduction of services. Therefore, the financial sector developed sound risk mitigation and management features. Considering a multi-cloud environment, this session will address possible implications by the involvement of third-party provider, picking up on the recent European Supervisory Authorities Joint Advice and its reference to a legislative solution for an oversight framework for monitoring of activities.

16.20

Closing speech - Putting cloud into a global perspective

16.40

Closing remarks

Wim Mijs, CEO, European Banking Federation

16.45 - 18:00

Networking reception
