

# CLOUD COMPUTING TRANSFORMATION IN FINANCIAL SERVICES

**A LOOK AT CLOUD MIGRATION STRATEGY  
AND CLOUD SECURITY COMPLIANCE**

19<sup>th</sup> January 2022

# CLOUD ADOPTION IN FINANCIAL SERVICES

## SURVEY PRESENTATION AND RESULTS

Nelson Phillips | Professor of Technology Management University of California

19<sup>th</sup> January 2022

# CLOUD COMPUTING: AN ENABLING TECHNOLOGY

Cloud computing is an enabling technology in Financial Services, just as it is in other sectors!

## Cloud in Financial Services Survey

29%

29% of the financial institutions identified **on-demand scalability** as the most important benefit of the cloud.

60%

60% of the respondents view it as among the top three benefits of the cloud.

19%

19% of the financial institutions identified **enabling innovation** as the most important benefit of the cloud.

44%

44% believe it to be among the top three benefits of the cloud.

**Cloud-enabled health protection for 450 million Europeans...**

**...since 2018.**

Powered by  **REPLY**

# THE FUTURE IS CLOUD...

There is a general consensus that the move to the cloud is overwhelmingly positive.

Percentage of respondents who selected this benefit as one of the top three benefits presented by the cloud

# CHALLENGES REMAIN...

At the same time, financial institutions face a number of challenges when moving to the cloud.

Percentage of respondents who selected these challenges as one of the top three challenges presented by the cloud

# OPERATIONAL AND CYBER RESILIENCE...

The cloud is perceived as a positive contributor in terms of operational and cyber resilience but...

## Cloud & Operational Resilience

29%

46%

For 29% of the financial institutions, across all levels of experience, one of the cloud's many benefits is to improve **operational resilience**.

This needs to be balanced with the risk of (excessive) **reliance on third-party suppliers** (i.e., CSPs), a point of concern for 46% of the financial institutions.

## Security: The Striking Paradox...

22%

57%

For 22% of the financial institutions, **enhancing security** is one of the top three benefits of the cloud.

However, for 57% of the financial institutions, **security** is one of the top three challenges of the cloud.

# REGULATORY FRAGMENTATION...

Regulatory and compliance concerns is a predominant challenge of migrating systems to the cloud.

## *Regulatory and Compliance Concerns*

9%

74%

Whilst 9% of the financial institutions consider that **facilitating regulatory compliance** is one of the top three benefits of the cloud, 74% regard **regulatory compliance** as one of the top three challenges of the cloud.

Progress is being made, not least in Europe, but much remains to be done.

# CLOUD ADOPTION IN FINANCIAL SERVICES

Insights from the Imperial College Business School / Reply Survey

## Key insights into cloud adoption in financial services

### BENEFITS OF CLOUD IMPLEMENTATION

The adoption of cloud has important benefits:

SCALES ON DEMAND

ENABLES INNOVATION

SPEEDS UP IMPLEMENTATION

DECREASES RELIANCE ON LEGACY SYSTEMS

### CHALLENGES OF CLOUD IMPLEMENTATION

But significant challenges still face firms that seek to adopt:

LACK OF SUITABLE SUPPLIERS

LACK OF CULTURAL READINESS

DEPENDENCE ON THIRD PARTY SUPPLIERS

SECURITY

### FACTORS AFFECTING THE TIMING OF ADOPTION

Timing and speed of adoption are affected by a number of factors:

REGULATORY REQUIREMENTS

INCOMPATIBILITY WITH EXISTING SYSTEMS

# CLOUD MIGRATION

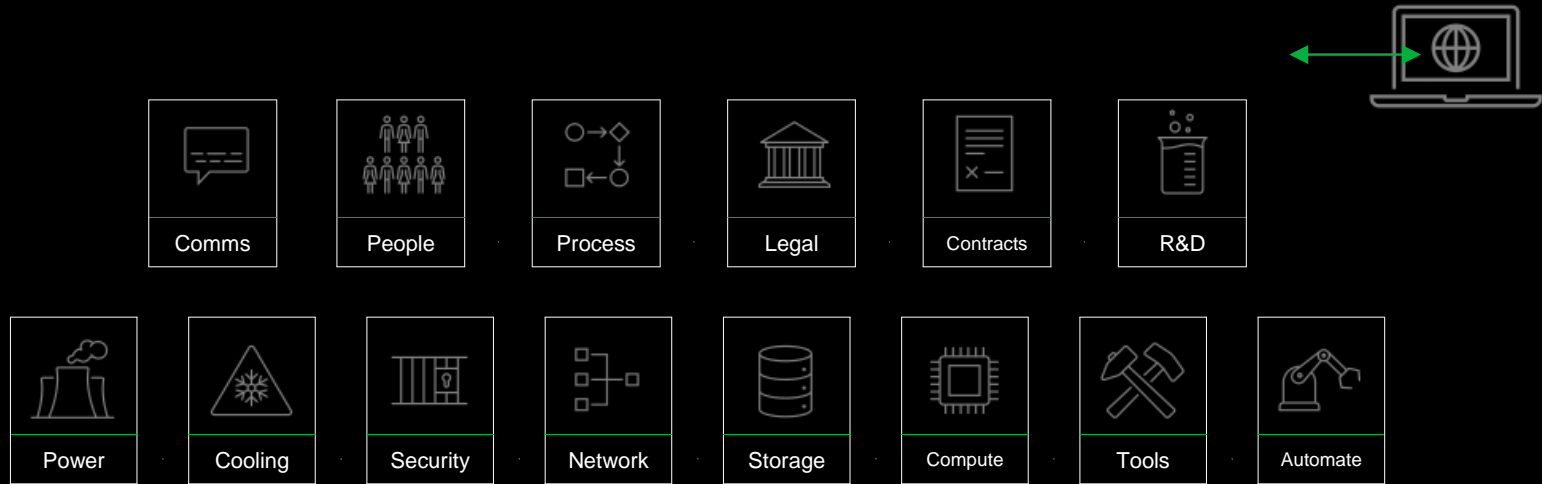

## 5YR OUTLOOK

Matt Mould | Partner Storm Reply

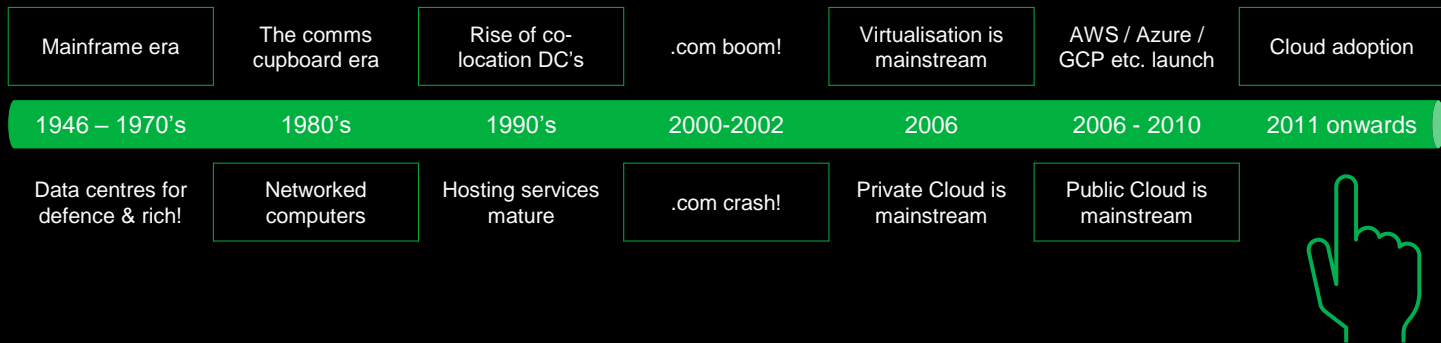

19<sup>th</sup> January 2022

# THE UBIQUITOUS WORLD OF CLOUD

# EVOLUTION OF CLOUD

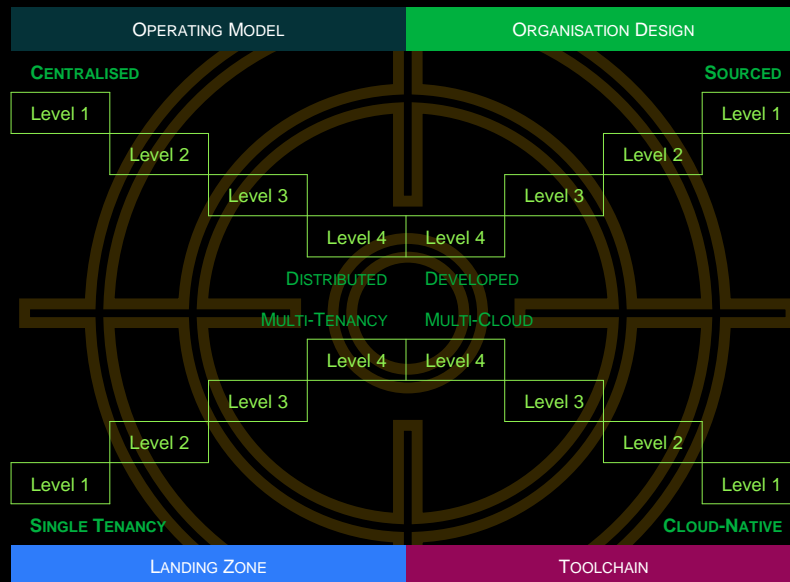

Maturity & Evolution

# CLOUD MATURITY LEVELS

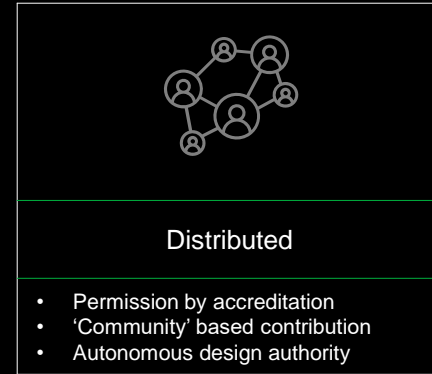

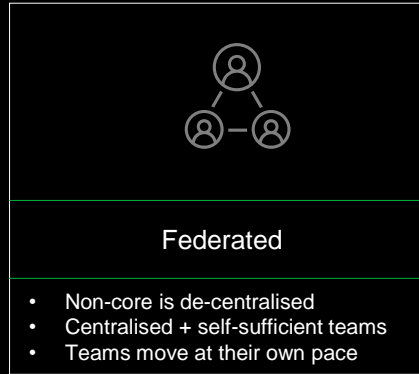

4 dimensions across organisation change and technology

2022	2023	2024	2025	2026
Level 1	Level 1 - 2	Level 2 - 3	Level 3 - 4	Level 4

# OPERATING MODEL MODES

# ORGANISATION DESIGN | HOW

## Leadership Alignment

- Stakeholder assessment
- Leadership action plans
- Facilitate change network
- Leader 'talking points'
- Perform readiness check

## Communication

- Develop key messaging
- Maintain program intranet
- Video messaging
- Support All Hands
- Provide 'Communications

## Learning

- Training strategy
- Foundational training
- Tool-specific training
- Measure training success

## Landscape

- Current state assessment
- Perform gap analysis
- Define changes to roles

# TRANSITION & FUTURE

The unavoidability of change and progress...

Do you see yourself at the company in 2025?

Is the organisation aware of future trends?

Service	Managed 3-5yr contracts DC + Cloud	Managed 3yr contract DC + Cloud	Managed <b>Rolling contract</b> DC + Cloud	Hybrid Zero contract Cloud	Hybrid Zero contract Cloud

# FSI WORKLOADS IN CLOUD

## Key Technology

i386/x64 (Windows / Linux)

File storage  
Datawarehouse  
Relational Database

Mainframe  
(z/OS | COBOL | JSL | AS/400 | DB2)

## Cloud Affinity

Yes

Partial

Yes

## Key considerations

- Base OS support
- ISV support of Cloud compute
- Latency to non-Cloud systems

- Minor – major refactoring required
- Data validation (source vs. target)
- ISV support of new target platform

- Based on emulation software
- Minor – major refactoring required
- ISV support of new data platform

# THE SHIFTING SANDS OF THE CLOUD RESPONSIBILITY MODELS

Phil Longley | Head of Cloud Security Practice Airwalk Reply

Costas Kourmpoglou | Senior Security Consultant Airwalk Reply

19<sup>th</sup> January 2022

# RESPONSIBILITY MODELS

The shared responsibility model

# SHARED RESPONSIBILITY MODEL

Source: Microsoft Shared Responsibility Model

	Responsibility	SaaS	PaaS	IaaS	On-prem
Responsibility always retained by the customer	Information and data	Customer	Customer	Customer	Customer
	Devices (Mobile and PCs)	Customer	Customer	Customer	Customer
	Accounts and identities	Customer	Customer	Customer	Customer
Responsibility varies by type	Identity and directory infrastructure	Shared	Shared	Customer	Customer
	Applications	Shared	Shared	Customer	Customer
	Network controls	Shared	Shared	Customer	Customer
	Operating system	Shared	Shared	Customer	Customer
Responsibility transfers to cloud provider	Physical hosts	Microsoft	Microsoft	Microsoft	Customer
	Physical network	Microsoft	Microsoft	Microsoft	Customer
	Physical datacenter	Microsoft	Microsoft	Microsoft	Customer

 Microsoft    Customer    Shared

# SHARED RESPONSIBILITY MODEL

# CORE PROBLEM AREAS

## Complexity

Hundreds of services, not always secure by default.

## Point In Time

Compliant on Friday doesn't mean compliant on Saturday

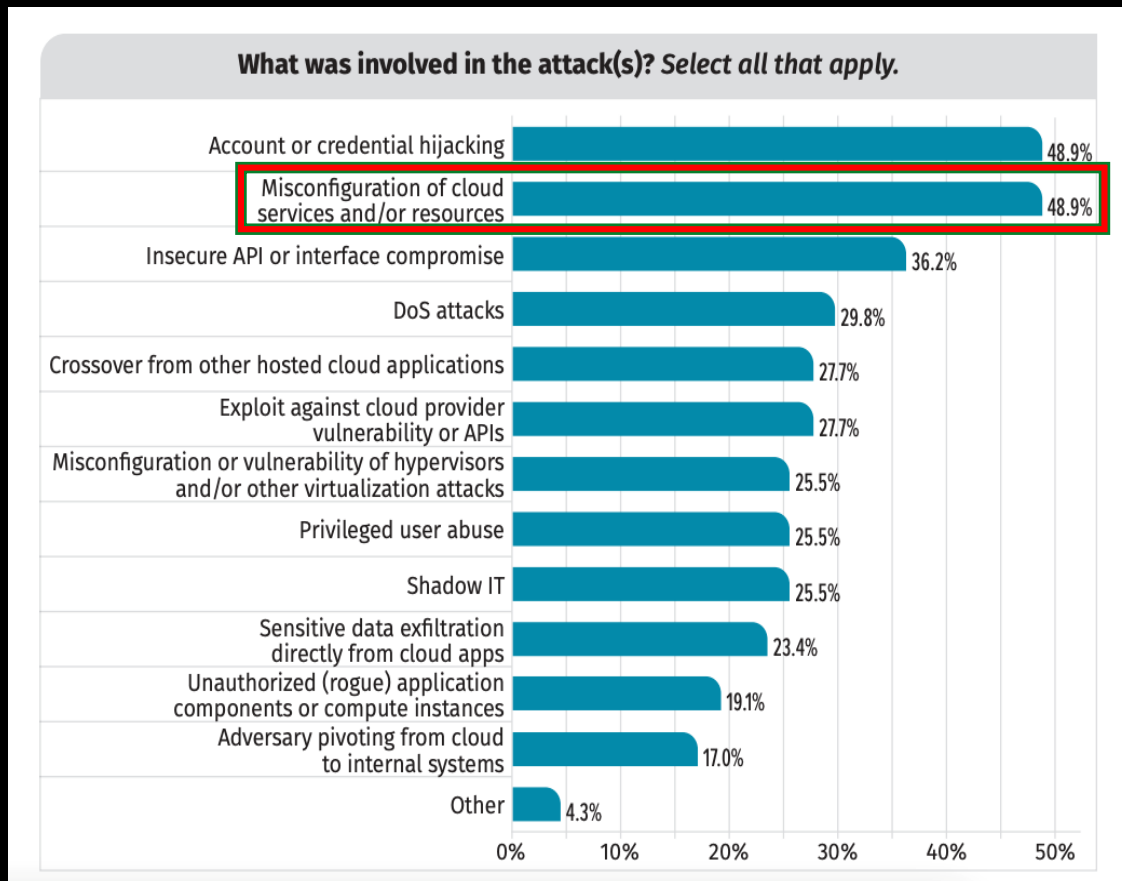

## Stagnation

Product Delivery is stifled

# COMPLEXITY

Source: SANS 2021  
Cloud Security Survey

# POINT IN TIME

**Table 1. Compromise to Detection to  
Containment to Remediation**

<b>Duration</b>	<b>Time from Compromise to Detection</b>	<b>Time from Detection to Containment</b>	<b>Time from Containment to Remediation</b>
Unknown	19.2%	7.7%	11.5%
Less than 1 hour	3.8%	19.2%	15.4%
1-5 hours	0.0%	30.8%	15.4%
6-24 hours	19.2%	15.4%	7.7%
2-7 days	30.8%	23.1%	23.1%
8-30 days	11.5%	3.8%	15.4%
1-3 months	15.4%	0.0%	3.8%
4-6 months	0.0%	0.0%	3.8%
>1 year	0.0%	0.0%	3.8%

# CLOUD SECURITY POSTURE MANAGEMENT

Monitor, report, and act on the security management of cloud workloads

# CLOUD SECURITY POSTURE MANAGEMENT

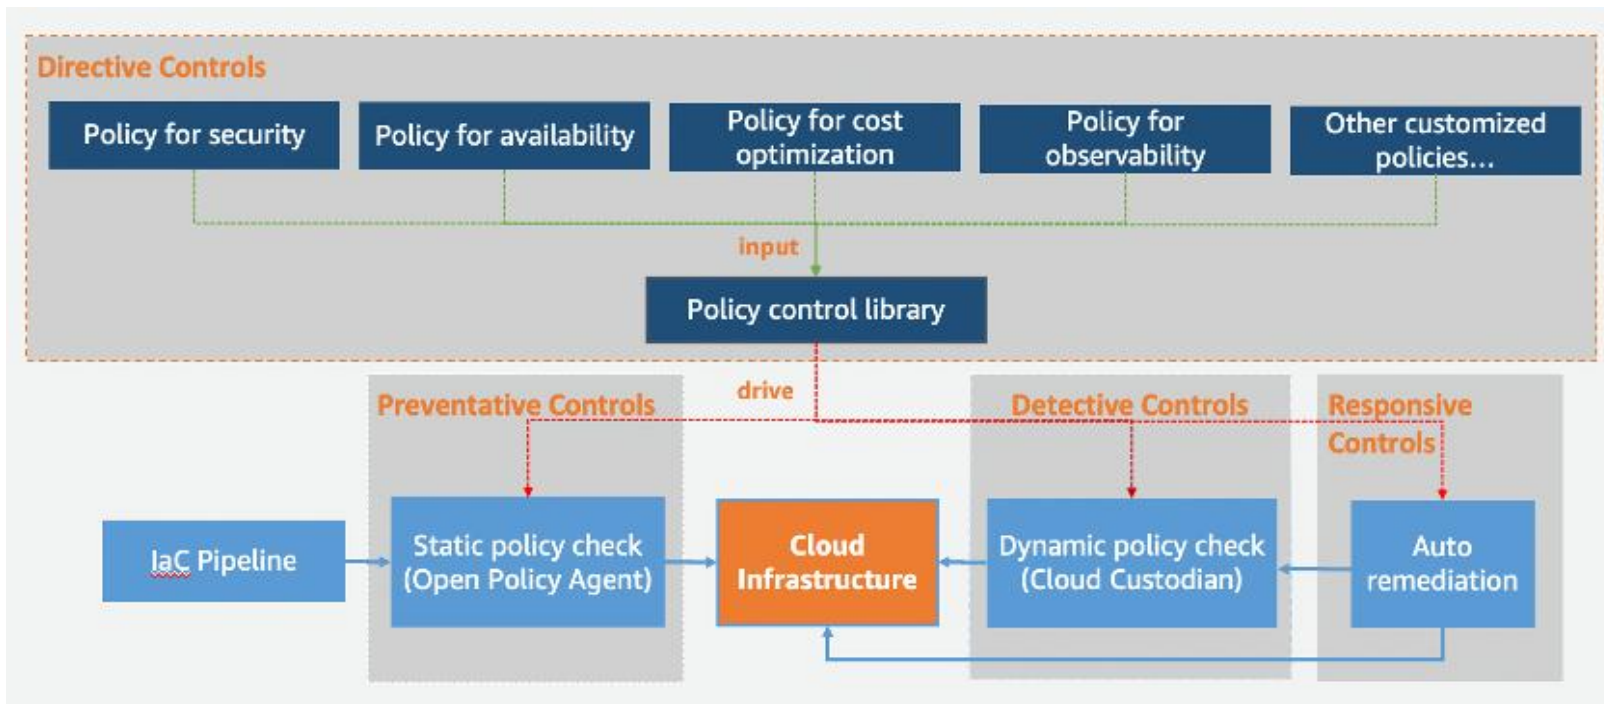

CSPM - is a continuous process of cloud security **improvement** and **adaptation** to reduce the likelihood of a successful attack.

# **POLICY AS CODE**

# POLICY AS CODE

# CONTINUOUS COMPLIANCE

Case Study: A global bank

# GLOBAL BANK

The start of the cloud journey – needs

Wanted to get the most from cloud but concerned about compliance.

Needed a structure that promotes **innovation** but with **guardrails**.

# GLOBAL BANK

Solution was found

- Evaluated estate and **controls** required.
- Prioritised **Critical controls** that protect the bank against data loss
  - Insider and external risk
- Implemented **Continuous Compliance**.

# CSPM AND CONTINUOUS COMPLIANCE

1

## CONSISTENT

Gain confidence in secure configuration

Prevent incidents

2

## CONTINUOUS

Remediate and notify in near real-time

Minimise the exposure window

3

## DELIVERY

Get the most out of cloud native services

Encourage faster innovation with guardrails

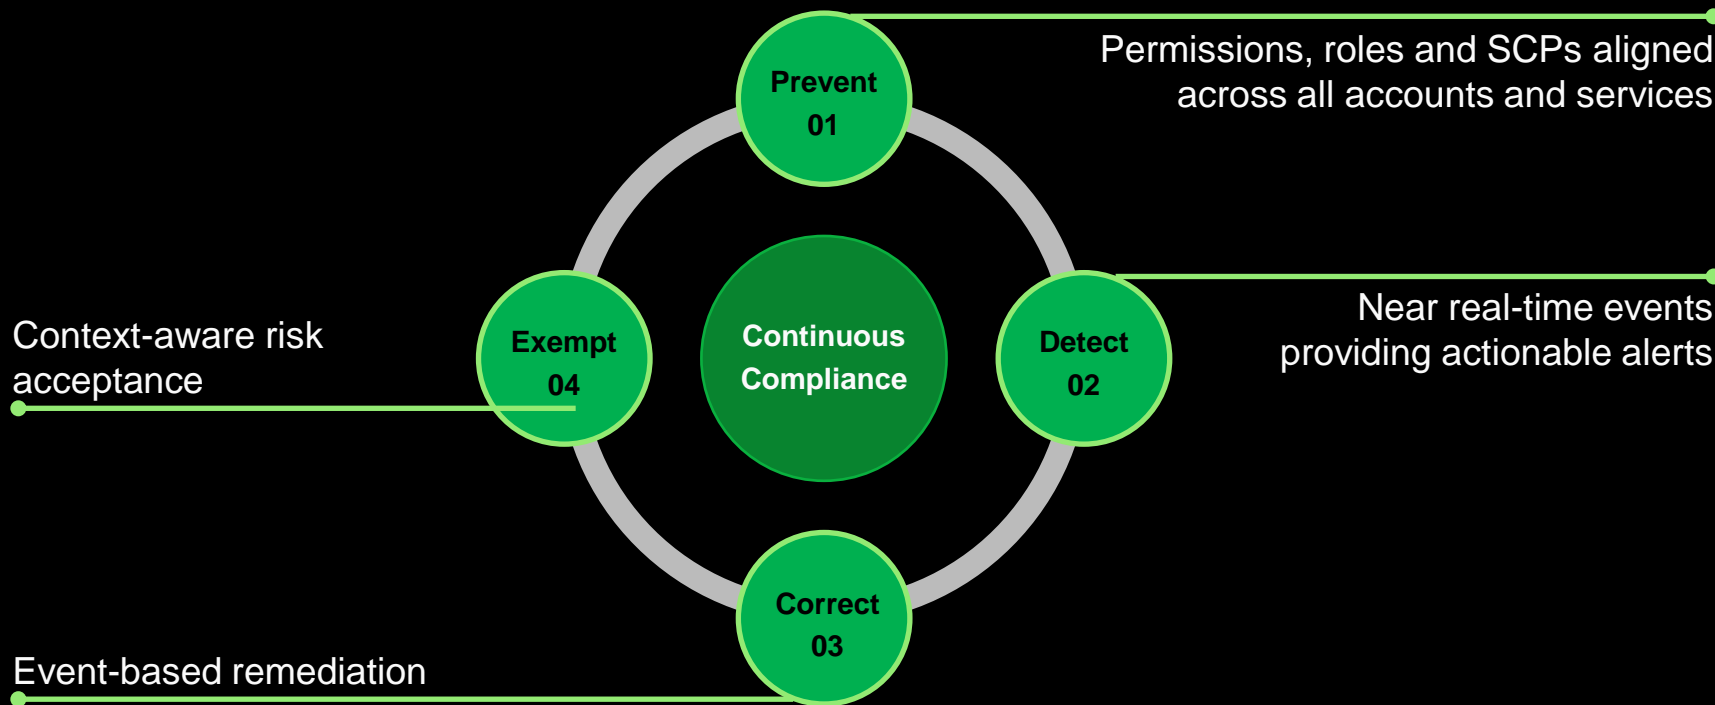

# GLOBAL BANK

Current scale of AWS adoption

- Around **2000 Engineers** using **1000 AWS accounts**.
- **200+ critical controls** for over **80 AWS services**.
- Over **50 regulated applications** running on AWS.
- All protected by **Continuous Compliance**.

# CSPM IN CONTEXT

# Q&A AND CLOSING
